June 2019 | page 1 of 2

ORTHOPAEDIC CLINIC:

Please refer acute and chronic orthopaedic injuries requiring orthopaedic surgery assessment to this clinic. All referrals are triaged by the orthopaedic surgeons. Following triage, patients are booked into the intake clinic for an assessment with either an orthopaedic surgeon or a sport medicine physician. Patients attending this clinic may also be assessed by a physiotherapist. Whenever possible, intake clinic patients assessed by a sport medicine physician who also require an orthopaedic surgery consultation will be seen on the same day.

More urgent cases such as fractures, locked knees and tendon ruptures MUST be discussed with the Orthopedic Surgeon on-call (by contacting Mineral Springs Hospital (403-762-2222)) in addition to completion and faxing the referral form to our office.

Please note

- The Orthopaedic clinics are for **residents of the Mountain Parks Region**.
- All other patients needing a referral to Banff Sport Medicine should be referred via a Sport Medicine physician.

SPORT MEDICINE CLINIC:

Please refer patients with sport-related injury and illness to this clinic including acute and chronic musculoskeletal injuries, concussions, overuse injuries, acute neck and back injuries and exercise related medical conditions. All referrals will be triaged by the sport medicine physicians.

Preliminary investigations (i.e. appropriate x-rays or labs) may be requested prior to an appointment being booked. The preferred x-ray views of our Banff Sport Medicine physicians can be found on our website under "Referral Information". Referrals from physicians and physiotherapists will be accepted.

Please refer to our website (www.banffsportmed.ca) for additional information about our clinics and referral processes.
